

NO TIME TO WAIT!

**Protect your
baby's life –
take them for
an HIV test**

HIV is especially dangerous for young children but treatment is free and works well. If they are tested and treated as early as possible, children with HIV can lead long, healthy lives.

Whether you are living with HIV or not there are simple steps you can take to protect your family.

Reach out to someone you trust, a friend, support group or health worker and find out more today.
